Fun little music sandbox, if you like music and\/or logic I'd definitely recommend giving this a try - enjoy building up 'circuits' to power your beats.. Edit 02\/10\/2018: Since I wrote this review initially, the dev has actually created a method of movement that allows us to play the game without having to have an open room. This makes everything within reach.

Original Review Below:
It's actually really cool, but I really do wish there was a way to move without needing roomscale, as this game seems to place every function riiiiiight where my IRL bookshelf is. Right now, I can see that it's super cool so I'll give it a thumbs up, but for me to actually play this, I think I'll need to get an open room to play in.. basically PD in VR. Super lovely, way underrated.. The most fun I've ever had taking a hearing test! -seriously, really neat sound sandbox. Early days, but a pretty fantastic audio experimentation interface :). If you're into music and sound design you can't miss this one, think about a VR Reaktor...
devs are active and updates are coming quite fast, they list to the community so thumbs up and full support!. This is simply amazing! Add this to the list of "Things I Didn't Know I Needed in VR But Totally Do!"
