A relatively solid tycoon fashioned after the old-school classics, Tavern Tycoon is still a bit rough around the edges but well worth the price. The graphics are a bit dated and clunky but carry a lot of character to make up for it. My only real complaint is that the punishment for a lack of research is too extreme and too early.. still needs a lot of work.. Absolutely amazing game. Well worth my money! Highly addictive as well. It's amazing that it's only 1 person that created this game. There is some improvements than can be made. Can we have the facility to upgrade rooms and furniture? Maybe paint the walls or something to improve on interior? Is there also a way where if we click on a member of staff under 'Manage: that the screen focuses on the specified staff? Despite my suggestions, I still love the game.. I was in a mood for a tavern manager sim game and Tavern Tycoon did not disappoint. Like others have said, it feels a lot like Hospital Tycoon (I remember it from MANY years ago) Its very well made and looking forward to all the content they regularly update with. I adore the different themed maps with each scenario and it also lets you play Endless mode with a page of custom settings you can make. With that said, I do have some points to cover. This game can tend to get glitchy if you have a pretty massive tavern in Endless mode, but I never had much issues when going thru scenarios which IMO the scenarios alone made this game worth the price. As others have mentioned handyman stop cleaning, certain rooms just dont get used etc. It seems the game can get quite overloaded at that point and all the different algorithms start to confuse each other. All in all I think its a great game, very well made, just needs some touch ups in the code & guts.. Its literally Theme Hospital but a Tavern instead, It lacks the polish Theme Hospital had but its still great fun.
